

For Immediate Release:

The City of Highland has retained Governmental Assistance Services (GAS) from Lawrence to conduct a Low-to-Moderate income survey this summer for the purpose of qualifying the city for a Community Development Block Grant (CDBG). The grant is intended to offset the costs of a proposed water treatment/distribution improvements project. Qualifying for this grant will help to keep future utility bills down.

Representatives from GAS will be conducting the survey door-to-door and by telephone between the dates of June 23, 2020 and September 15, 2020. The survey will be conducted using strict social distancing measures. Surveyors will knock at your door and ask 4 questions from an appropriate distance. Each survey will take less than 1 minute.

You will recognize members of the GAS Survey Team by their clipboards and white golf shirts.
